Second Wall Height	8'

Plan Description

Craftsman styling provides an air of charming sophistication to this 2-story, narrow multi-family house plan. Inside, guests are greeted by an entry area that opens to a straight staircase. A few steps further reveal the kitchen with its island work area, walk-in pantry, and ample counter space. The adjacent breakfast area provides access to the outside through sliding doors. Open to the kitchen and breakfast area is the great room, with its fireplace and views to the rear. The mud room includes a bench, lockers, coat closet, and powder bath, and also accesses the 1-car garage. Upstairs, a pampering master suite features a bath area with his and her vanities, and an extensive walk-in closet. Bedrooms 2 and 3 share a jack and jill bath. As always any Advanced House Plans home plan can be customized to fit your needs with our alteration department. Whether you need to add another garage stall, change the front elevation, stretch the home larger or just make the home plan more affordable for your budget we can do that and more for you at Ahp. Unless you purchase an unlimited use license or a multi-use license you may only build one home from a set of plans. Plans cannot be re-sold.
