Foundation Wall Height	9'
Main Wall Height	9'
Second Wall Height	8'

Plan Description

Modern styling, accented by steep rooflines and contrasting stucco siding, conveys a welcoming appearance to this efficiently designed, 1.5-story home plan. Entry through the front covered stoop reveals an open arrangement of the family room, dining area, and kitchen. The great room is warmed by a fireplace and brightened by a trio of windows on the front wall. The kitchen itself includes an island and a convenient corner pantry. The main-floor master suite is entered through an entry cove and features a 9-foot-high boxed ceiling. Its bath area features his and her vanities, walk-in shower, compartmented toilet and a walk-in closet. The walk-in closet also accesses a utility area that includes the laundry, powder bath, and mud area, featuring a bench and lockers. On a practical note, this utility area intercepts debris from the outside, as it accesses the home's 2-car garage. On the second level, three bedrooms all enjoy their own walk-in closets. Bedroom 2 has its own bath, complete with shower, while bedrooms 3 and 4 share a Jack-n-Jill bath. An optional attic area offers expansive storage space, along with countless other options for its use.
